CAREER OBJECTIVE

Third-year B.Tech Computer Science and Engineering student seeking an internship to apply programming, database, and web development skills while learning from real-world software projects. Interested in building useful applications and strengthening problem-solving and software development practices.

EDUCATION

B.Tech in Computer Science and Engineering

CSMSS Chh. Shahu College of Engineering | Third Year

TECHNICAL SKILLS

Programming: Python, Java, C

Web: HTML, CSS, JavaScript

Database: MySQL

PROJECTS

Student Management System

Built a basic student-record application using Python Flask and MySQL to query student information and display records through a web interface. Worked with database connectivity and HTML templates.

Smart Book Reader and Learning Assistant

Project concept focused on helping learners use PDF books more effectively. Planned capabilities include PDF text extraction, text-to-speech listening, vocabulary support, question-based explanations, and learning progress tracking.

Predictive Detection of Land Acquisition Delay

Project concept for analyzing land-acquisition process information to identify possible delay risks. Proposed factors include approval timelines, document completeness, legal disputes, compensation status, and rehabilitation progress.

ADDITIONAL INFORMATION

Experience: Fresher | Seeking: Internship opportunities

Note: Add your expected graduation year, CGPA/percentage, and any verified certifications or achievements before applying, if applicable.
